

iVisor AG - 100% Bubble-free anti-glare, anti-fingerprint screen protector for the iPhone 4

### Capacitive iPad 2 Stylus

While capacitive touch screens are great, one flaw is the inability to use a stylus. Not anymore! BoxWave's **Capacitive Stylus** allows you to use your Apple iPad 2 without ever touching the screen with your finger. Perfect for the ladies out there who have their nails done, or for those who don't want to take their gloves off during a cold day. The **Capacitive Stylus** is conveniently sized, and designed like a pen to fit just about anywhere.
